

KOUKAKIS FARM. From a cottage industry to a state of the art plant.

THE VISION

The transformation of a cottage industry of processing milk into a modern production unit, with pure, natural yet delicious, safe and quality products.

THE CHALLENGES

The gradual modernization of the unit, following the company's growth, and with full commitment to Return On Investment.

RESULTS

A modern production unit, which ensures complete control and full range of pure and high quality products. A unit that works efficiently and productively making significant inroads in difficult markets!

PROJECT DESCRIPTION

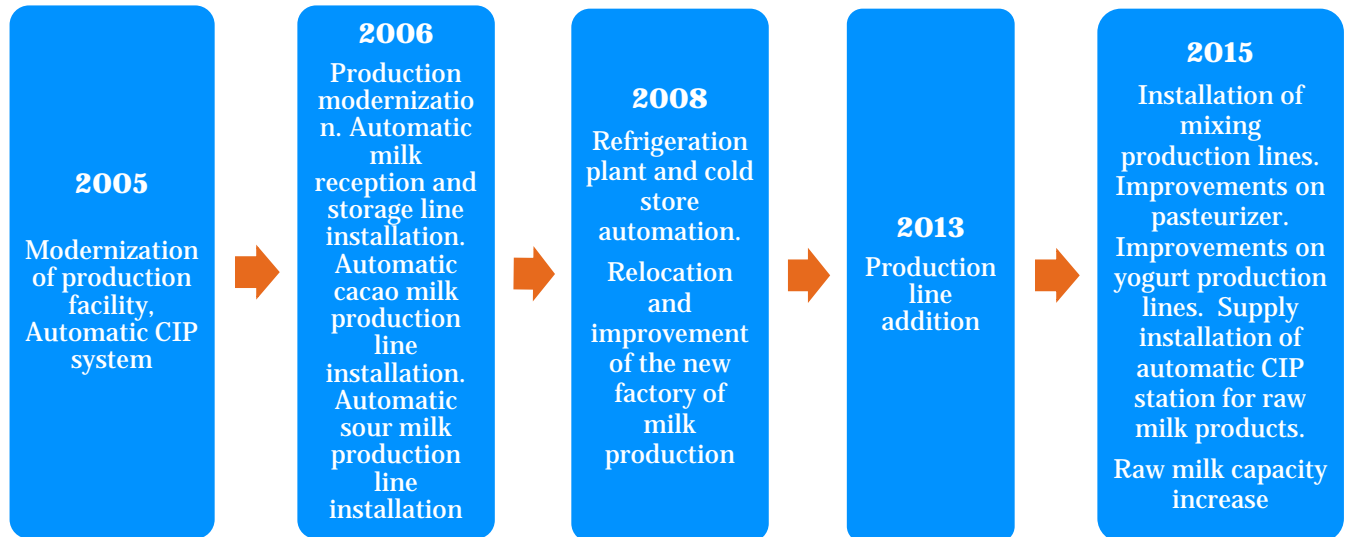

Almost 40 years passed since Kostas and Olga Koukaki created in 1977 a small farm. In 1999, their son, Thanasis makes a cottage industry to process his milk and creates the Koukaki's Farm. Today, 17 years later, this little cottage industry has developed into a modern facility, which exports its products to demanding European markets (France, Italy, Great Britain, Netherlands, Poland, Ukraine, Cyprus), and with immediate plans to enter the German market!

The farm's milk, comes directly from nature, is 100% Greek, from local animals and feed, while collected pasteurized and packaged daily.

Despite its small size, Koukaki's farm invests in infrastructure and modernization of the production process. Since 2005, **AS Automation System Hellas** designs and manufactures production lines and equipment for Koukakis Farm, and

automates the production processes, contributing to the realization of Koukakis' vision!

*“Since 2005, **AS Automation System Hellas** designs and manufactures production lines and equipment for Koukakis Farm, and automates the production processes, contributing to the realization of Koukakis vision!”*

TODAY

The 5000 sqm plant in Kilkis processes 18 million litres of milk a year, in a fully automated processing facility! With focus on safety, quality, and better utilization of the available resources.

All these years, Koukaki's farm demonstrates surefire recipe for success. Vision, faith, perseverance and dedication. **In this effort, we are proud to be their partners!**
