

Automation System Hellas

## QUALITY, ENVIRONMENTAL, HEALTH & SAFETY POLICY

**AS AUTOMATION SYSTEM HELLAS** is one of the leading companies in **Plant Engineering, Industrial & Building Automation**. Operating on an international network, has successfully managed to integrate international suppliers and **know-how** to deliver **projects worldwide**.

Our main scope is to **support our clients across the Globe in the fulfillment of their vision**, taking into consideration current legal requirements, technological developments, environmental aspects and occupational health & safety.

The basic axes to achieve our scope are:

- Setting, systematic monitoring and reviewing of Quality, Environmental and Occupational Health & Safety objectives
- Partnerships with the most trusted and innovative brands worldwide, to offer custom-made applications
- Provision of necessary resources
- Expansion and transfer know-how to and from each project, through and organized communication system
- Enhancement of consultation and participation of human resources
- Provision of safe and healthy working conditions for prevention work-related injury and ill health
- Protection of the environment, through prevention of pollution, efficient use of resources and implementation of appropriate environmental programs
- Fulfillment of applicable legal and other requirements
- Elimination of hazards and reduction of occupational health & safety risks
- Continuous effort to improve the Integrated Management System we implement, according to **ISO 9001, ISO 14001, OHSAS 18001**.

Company's Management is committed to review regularly current Policy and the Integrated Management System that implements.
